Ok, thank you for your answer Do you have any idea how to fix this? EDIT : I tried to install Photoshop CC from my scratch and it worked without problem A: HELP! I'm using CS6 and I thought I would try out LR CC. I'm going to copy my photos and videos from my computer and then I get this error message! This must be related to that. I have no experience with Adobe Lightroom, so this is just my suggestion. It's a pretty simple solution if you're willing to spend a couple of minutes: Go to the Origin site. Click on "Components" in the top left (marked with an orange arrow) Click on the "Adobe Creative Cloud" component Activate the CC component (click on it) Go back to the "Installed components" tab in your Creative Cloud (formerly Lightroom) app Check the "Software" tab to ensure that your copy of Photoshop is the latest version. If it isn't, click the button and "Update Now" Click on "Install" and it should work (assuming the download is complete). The alternative is to contact Adobe. *Lepidochrysops lioneus* *Lepidochrysops lioneus*, the Lione's blue, is a butterfly of the family Lycaenidae. It is found in South Africa. The wingspan is 23–27 mm for males and 27–32 mm for females. Adults are on wing from February to April (with a peak in March). There is one generation per year. That perception goes beyond a bunch of hyperbolic bloggers. It has been covered over the last two or three months in a book-length consumer report by Roger H. Paddock and Mark Lyons. At Harvard University, Lyons was the technology columnist for the Harvard Crimson. Although he has always been an Apple man and has criticized the way Microsoft has responded to tech challenges, like the introduction of Windows
