Previous versions AutoCAD Product Key Extended was first released in the 1982 CAD 3.0 as an

add-on for AutoCAD Product Key 1.0 and 1.1, with some of the functionality already present in 1.0. Although developed by Cadence Design Systems, AutoCAD Product Key Extended was generally used by users, rather than the CAD industry. While the 1990s saw the beginning of a move towards more of an integrated Windows-based product, AutoCAD Activation Code Extended continued to be developed and marketed, though with a slightly reduced feature set. In 1998, Cadence Design Systems bought CrossWire and a year later renamed it to Allegro, with the development of AutoCAD Extended still continuing. However, this version was not to be the last. In 2001, after 11 years of continuous development, AutoCAD was restructured, resulting in the release of AutoCAD 2004 in 2002. This first iteration had a significant amount of legacy functionality, with ObjectARX being a part of the product. The release of Autodesk DWF Viewer (2003) marked the beginning of a series of releases, with the first one being released in September 2002. In the same year, Autodesk released CAD/CAE for Microsoft Windows, which was discontinued in September 2005. After this, there was no viable product for the market for which AutoCAD was designed. In the meantime, internal software such as Worldspace and some of the functions of ObjectARX were included in AutoCAD 2004. In 2007, in response to the move towards Windows Vista and Windows 7, Autodesk released AutoCAD 2007 as an application, rather than a completely integrated CAD/CAE suite. AutoCAD 2007 included many new features, with the most notable being the application that was AutoCAD and AutoCAD LT on a single platform, and a new file format named DWGX. In October 2011, AutoCAD 2011 was released with significant new functionality. One of the key features of this version is Shape Lock, an add-on to AutoCAD that allows users to customize the process of locking. The DWGX format was retired in favor of the new DWG format. In July 2014, AutoCAD 2014 was released. This version was a return to the much older version numbering of AutoCAD, which was discontinued in 2006. AutoCAD 2014 was one of the last remaining AutoCAD products that contained the older version numbering of a1d647c40b

An Israeli-Canadian woman has been detained in Egypt on suspicion of spying, a year after a Cairo court sentenced her to three years in prison and five years in absentia on charges of spying for Israel, her Israeli lawyer said on Monday. Naomi Tadmor, 47, was arrested on Saturday and is being held at a Cairo police station, said Reuven Erlich, a legal representative in Cairo who has been hired to defend Tadmor. Tadmor's arrest is the first time in more than a decade that Israel's embassy in Cairo has held an Israeli citizen in custody, the last known case of an Israeli being jailed being that of Mahmoud Issa in 2001. An official at the embassy, who asked to be unnamed, said Israel's foreign ministry had not been informed of the arrest. "The Israeli authorities do not know anything about the arrest," the official said. The Israeli-Canadian's lawyer said that Tadmor was not informed of the arrest by police officers who appeared to be Egyptian. "She was arrested without any prior notice," Erlich told AFP. "She said that she was taken to the office of the intelligence services... I asked them what it was all about but they would not answer my question. They did not know." Police officers told Erlich they had orders from the chief of staff of Egypt's armed forces, a charge he said was untrue. "I am shocked that they (the officers) said that they had a direct order from the chief of staff. He did not tell them this. He did not ask them to arrest her. They said that they received this order on their own," he said. The arrest of Israeli citizens on Egyptian soil has been a politically sensitive issue in Israel in recent years amid tensions with Egypt over the Gaza Strip. Tadmor and her husband, Israeli tycoon Ezra Tadmor, were sentenced to five years in prison and fined $9,000 in absentia in 2015 on charges of working for
