Electrocardiograph ECG-1103GW ECG-1103GW (CAREW) ECG-1103GW (CAREW) with ECG, C-arm in intensive care. Ability to connect to a computer and printer. 3.5"

---

color LCD monitor (4.5" on request). Memory for 1024 ECG recordings. Automatic averaging and time averaging of ECG. Automatic switching of ECG polarity, VOICE mode. S-T mode. Selecting the pulse repetition rate for ECG. S-T mode provides more reliable ECG readings. In this mode, the ECG records the pulses that appear between two series of normal heartbeats, while in S-T mode all possible rhythm abnormalities are recorded. When you set the S-T value on the ECG recorder, the display will show a picture consisting of green dots, spaced equidistantly from each other. This is what a "normal" line looks like on the cardiac monitor. There are a lot of posts on the web about the problems with ECG recording via T-MACS (terminal-based access control system) - a system for transmitting data from patient to doctor. I decided to get to the bottom of this issue. For this I had to use various protocols for transmitting data. In the end of this article, I will describe the options I used and what they were. If you have any questions, please write them in the comments. 1.

---

**Skill Scaling** The first thing I did was to start pumping all of the available skills. I did not take into account skills that are tied to certain classes, because I had no desire to learn blood magic, as well as skills that were not available in normal mode (eg, magic fire). At this stage I tried to pump all the skills as much as possible and did not look towards their additional improvement. It's worth noting that I didn't take into account skills that were of the "default skill" type. Every time I hit an enemy, I counted to three; if it was destroyed, I got five experience units. If I made it to three, I got three experience units. At level 20, I was able to improve one of my skills. "Devouring Life" gave me the ability to devour the lives of my opponents after each of my hits. Unlike the basic skill, I needed to kill opponents in order for Eating Life to work. Eating Life. Skill. Level 10. Takes 10% energy.
