Clark, who died Monday of a stroke at a retirement home in Chappaqua, New York, had come to be known around the world for his work documenting Wright's life. He was also counted among the world's leading authorities on 20th-century art and architecture, more expert in his prime as a critic and biographer than anyone else. Octavio Wright said Clark's death was a "great loss for the world, for the discipline." "He was an American treasure, in my view, and an American style icon," Octavio Wright said in an interview. "Just the sort of person who embodied the essence of the ordinary but extraordinary person." Clark's books have sold as many as a million copies worldwide. One of them, "The Lives and Times of the Artists of the Great American West" (Hill and Wang, 1989), compares the self-sufficient rugged individualism that defined 19th- and early 20th-century western art and architecture to the ideas of the modernist Frank Lloyd Wright. Gregor Clark's best-known work centers on Frank Lloyd Wright's relationship with one of the era's greatest artists, Georgia O'Keeffe. She had thought her talent was a manifestation of some mystical, almost divine power. Wright, however, saw her gifts as something far more deeply rooted in humanity. In his final book, "Final Solution: The Conquest of the West" (Knopf, 2002), Clark showed that Wright not only influenced O'Keeffe's art, but served as a model for her own self-expression. "She had been smitten with him since she was a girl," Clark writes in the book's introduction. "As the two became friends, they suffered through scenes of mutual attraction, mutual affection and mutual embarrassment." He described Wright's passion for O'Keeffe as "mad, mechanical, obsessive" but also revealed that Wright encouraged O'Keeffe to explore the limits of her talent, and eventually opened her eyes to her own value. "On the plane,

Kerio WinRoute Firewall 6.7.1 Build 6544 Patch 1. rarBEIJING/HONG KONG (Reuters) - China has upgraded its machine-learning tools to crack down on abuse of the country's social credit system, saying it had blocked more than 110 million fake accounts and suspended 3.3 million accounts, a government-backed newspaper reported. The report by the online edition of China Daily on Monday cited a tool made by the social credit scheme known as "Borg" that has helped plug loopholes in the system and curb some abuses. The scheme, made public last year, says it will use high-tech means to improve transparency and the fairness of assessments of citizens and companies. The newspaper report said the tool was no longer used to "harass citizens" but was deployed to "rectify mistakes in the scoring system and prevent violations of social behavioral norms". The government did not immediately respond to faxed questions. Some experts have said the system could in principle be abused to punish critics of the ruling Communist Party, but the United States has voiced concern that it could be used to suppress political dissent. The cabinet, army and public security ministry, which oversees the program, said last month that it had identified 209 major violations and 799 minor ones of social credit rules and regulations in 2019, up from 103 major violations and 638 minor ones in the previous year. China Daily reported that the machine-learning tool had identified 3.3 million accounts, of which 1.3 million were disabled and 230,000 accounts had two accounts suspended. Some websites and services enable users to circumvent the system and access mainstream social media.Q: Django Update Query Set I'm trying to update the status field when I want to update the user. My use case: User A and user B are friends, A and B are not friends, A and C are friends, C and B are not friends. I want to update 3da54e8ca3
