Blending images One of the reasons I mentioned the importance of digital camera stabilization in the previous section is to prevent the blurring of images caused by camera shake. You might be tempted to correct your blurred images by stacking them and merging them into one super blurry image, as shown in Figure 1-8. This technique is called `_blending_` and can be used in PS to remove camera shake by simply stacking two or more images and then blending them together. Photoshop has tools that you can use to accomplish this task. You can make the process fairly easy or difficult, depending on how many brush settings you use to overlap the images. The image can be blown up as much or as little as you want. But it's not easy. You can also use a tool called Image

## Photoshop 2021 (version 22)

Q: Is there a difference between "that is" and "which is"? In English we say that "I have a friend who was in boarding school when I was in nursery". This is grammatically correct. In other words, we can say that which is. What if we used that which is? Would it be correct or not? P.S. Just to be clear that I really understand the difference between that and which. A: That, in this context, refers to a certain person (who is my friend) and which is refers to a general category (people who were in boarding school during that time). I have a friend who was in boarding school when I was in nursery. or I have a friend who was in boarding school at that time. What to do when you're bored in NYC When you're travelling for several days in a row, one thing that you might find yourself dreading is sitting in your hostel room, which is pretty hard to avoid since you basically live in that room unless you take a stroll down the block every couple of hours to go explore the neighborhood. It's not always easy to find the right environment to go out and explore, you might be at your destination for a few days, and you don't have that many close friends that live in your hostel, so you might end up just sitting in the hostel a lot. But, if you're bored in NYC you actually have a lot to do. After all, you're in the Big Apple, so there's a whole lot to do here. Of course, going to the most popular tourist attractions is the most obvious thing that you can do to get out of your hostel room and away from your computer. If you're going for example to Central Park, it might actually be pretty crowded, but it's still a good way to get out of your hostel room and stretch your legs a bit. There are also loads of museums here, like the Museum of Modern Art or the Metropolitan Museum of Art, and they're some of the most popular museums here, so you can definitely check them out. If you're feeling really adventurous, you could always head over to the Alamo Drafthouse, which is an interesting place where you
