
Redynamix Hdr Dce Tools [EXCLUSIVE]

The ReDynaMix plugin uses a polished and easy to understand interface with immediate preview of settings. But it's not just about fake HDR images. It has other hidden virtues as well. First of all, it can work with any light source, including LED. It is very interesting. Even if you only have one light source at home, you can use ReDynaMix as a light source with multiple bulbs and shine different beams from different lamps on the same object. In this way, many different light sources can be simulated: sunlight, sunlight from a cloud, laser beams, light from a light bulb and even from a spotlight.
