Complete Website Downloader is a powerful Windows application designed to download entire websites from the Internet. Complete Website Downloader offers an extremely friendly and user-friendly interface with a great amount of features and options available. The app comes with the standard features of a website downloader, such as advanced URL filtering, automation of regular web updates, and support for downloading multi-level directories. Along with the essential features, Complete Website Downloader also comes with a web crawler, a web browser, a password manager, an FTP client, an RSS reader and more. Complete Website Downloader allows you to select any web pages from the main window of the program, where each individual page has the corresponding download link as well as the actual website's URL. You can also access the downloaded content by right-clicking on the link and then selecting Open In from the context menu. The amount of sites that can be

added to the main list is limited only by the available space. Every time you add a website to be downloaded, you can prevent downloading of parent directories and dynamic content, limit the number of subdirectory levels and the number of pages to a user-defined value. Additionally, Complete Website Downloader allows you to ignore URLs that contain a specific word or defined file types. As for the downloadable items, you can select the webpages, images and the other files from the main window of the app, with a dedicated option to instantly open a specific item or simply skip it. The downloading task doesn't take much time, but Complete Website Downloader sometimes crashes on Windows 7 workstations all of a sudden. Complete Website Downloader is a software project for the users who want to download the entire websites from the Internet.
