

Skyrim Being Female Belly Not Growing [PORTABLE]

Sep 6, 2020 - I'm building a body (CBBE 3BBB), in Racemenu I can use the belly knot, I have an inflation frame, but still the pregnant character's belly is not growing. I have already found other bugs related to these issues, but they have already been resolved. This time I can't figure out why my belly isn't growing. I have already played and played through Racemenu. I have everything I need and also have all the things I need. Please help. This question has been asked for years and a few days ago, but no one has been able to help. Any help is welcome as I have been looking for it for the last few days. Here is the full code. Here are some screenshots if that helps.
