I just wanted to tell you, this is an amazing program. I have my ebooks in many different locations: Ereader, Phone, and my pc. I am a devloper and I have tried a bunch of different ereader apps, but this one is by far the best. I wanted to find the best app to do this, and I found it. I was able to get this program up and running in less than an hour and I can't believe it took me so long to find this app. This is a great program. The price is perfect, it does not force you to purchase extra services, it is a fully functional standalone program that does not require any other programs. This is really nice for me because I just don't want any extra junk on my phone. I highly recommend this app to anyone. It is one of the best programs I have ever used. I have a Kindle and an iPad, and love reading on both. I love my app "iBookifier" because it makes it so much easier to read on my iPad while walking the dog! I also love my device, the Kindle, because I can read on the train, at the beach, in the park, anywhere. Calibre can be a pain because it's always having issues with my device. For example, when I wanted to download my Kindle book to Calibre it didn't work, so I switched to my Kindle app (OK, I know that was dumb, I know, but I don't have a PC anymore, so I have no idea how to do it). I was having all kinds of problems with my Kindle and Calibre. Plus, I wasn't reading anything else, so it was more annoying, to be honest. Hi, my name is EdaLot and I'm a book addict.
