Simulation games can be categorized in two modes: single player and multiplayer. If you have a single player simulation game, and you find yourself feeling like you're the only one enjoying it,

playing it with someone else might be the key to a new experience. Multiplayer games vary, but there are two that have a particular place in pc gaming. In SimTower, this "episode" approach to progression has several advantages because it is a particularly easy way to organize and build the next part of the simulation, and also because the player can remain somewhat in control, advancing in a linear manner. Episodic simulation

games would often feature multiple endings, in which if the player does certain things, the
