## CD Label Designer Crack Download

LabelMaker CD/DVD Label Designer is a professional application for creating CD or DVD labels that enable you to create unlimited jewel cases, booklets, business card disk labels and DVD box labels. New concepts LabelMaker CD/DVD Label Designer does away with the traditional CD label/CD jewel case and DVD jewel case concepts, while still offering all the customizability and wide configuration options that you need to create the most brilliant labels. Using LabelMaker CD/DVD Label Designer, you can add columns, set new backgrounds and lock objects as well as add or remove custom fields. You can even add folders that will be listed on every label. Furthermore, LabelMaker CD/DVD Label Designer allows you to save your personal style, so you won't have to start from scratch every time you want to design a new CD or DVD. LabelMaker CD/DVD Label Designer gives you the ability to create labels for one-disc CD or DVD and 4-disc CD or DVD. Main features: - Create CD or DVD labels with 1 to 8 labels per page - Create booklets with CD and DVD jewel cases - Create a set of DVD jewel cases - Create unlimited DVD box labels - Choose from five different customizable templates for your labels - Set different background images - Lock and unlock objects for customization - Print labels of various sizes - Create a set of business card disk labels - Add custom fields for your labels - Add folder or list to every label - Index file of the entire disk and create a file list - Add custom text and shapes - Edit your labels using the thousands of colors available - Customize the formatting of your fonts and fonts colors - Change font and color using the "Formatting bar" - Add audio files and automatically extract information - Define or update your custom fields - Choose between the traditional CD or DVD concepts and the latest new concept - Create a "Personal Style" to save your personal look - Optimize the labels for any monitor and printer - Print your labels in different sizes - Create video or audio labels - Print your labels as both CD and DVD - Save each page as a separate file - Print a set of labels in one session - Reduce paper usage and waste - Save and reuse your templates - Extract information from any disc file - Import your own images and color them - Choose between the 9.5" x 4.25" or

### What's New in the CD Label Designer?

◦ Homepage CD Label Designer can be used to create CD labels. The CD label design consists of several objects, including the front, back, spine, booklet or DVD box. ◦ 1 Template The only object to be created is a template. You can use a real CD for this. The template is composed by a table of textboxes. You can add text or shapes to this table, as well as remove them. ◦ 2 Insert In order to add elements to your template, you need to insert the proper object into the table. You can add pictures, textboxes, shapes, and even text above the picture. • You can specify the size and format of the pictures. ◦ 3 Delete You can select any object, and delete it from the table. ◦ 4 Properties CD Label Designer has a properties page that displays all the properties of each object. The properties page displays the image in the picture, the text and background color. ◦ 5 Layout You can reorder the objects by dragging and dropping them. You can select any object and change its size. The layout page displays the picture, textbox, background and width and height of the selected object. ◦ 6 Dialogs CD Label Designer has a dialogs page that displays a list of all the dialogs available. Selecting a dialog shows the configuration page for the object. If you select a new object, it will automatically be added to the table and placed on the layout. The user interface (UI) is very simple and straight forward. After you have learned the basics, you can configure CD Label Designer to suit your needs, then you can add your own pictures, fonts and all your other creative design ideas. CD Label Designer offers many different layouts for any type of project. In order to create a new project, click on the New icon. On the New project page, select the disk drive or the folder containing the project. Then, click OK. Now, click on the Select icon. Click on the desired drive and select the project file to open it. After you have set up a new project, click on the CD icon to insert a new project. Click on the CD icon. Click on the Disk or Folder icon to select the drive containing the disk you wish to add to the project. When you have selected the drive, the option File System will be displayed. Click on the File System icon. Note: ◦ If you have placed the project on an external hard drive, you will need to open the project file. ◦ Click on the folder icon if the project file is inside the folder containing the project. Now click on the Save icon. Type a name and click Save. If you wish to change the language of the
