Cyanamide is an anion antioxidant that accumulates in aquatic organisms, is well tolerated by humans, and can confer protection against environmentally induced cellular oxidative stress. In this study, juvenile rainbow trout, Oncorhynchus mykiss, were exposed to chronic hypoxia (1% O(2)) in the presence or absence of cyanamide on hypoxia-induced changes to lipid peroxidation and citrate synthase (COX), and heat shock protein 70 (HSP70) and 72 (HSP72) gene expression were investigated in the gills. The treatment with cyanamide alone resulted in a significant reduction in lipid peroxidation and a slight increase in mitochondrial COX activity compared with that in the control. Conversely, cyanamide had little or no effect on
