Kindly advise. The problem is that you can not create a PDF printer the same way that you would print a document to a physical printer. The PDF printer that you can install on Windows is just a wrapper for the physical printer. If you could create a PDF printer in Android it would actually be a printer. Thanks, they use the software you mentioned. Can you recommend me a way to print a PDF file on my Android? Please advise Thanks Many phones with print feature include a PDF printer. It would probably be easiest to print from a web browser using the file:/// URL. That will print the document in the browser and you can copy or take a screenshot of it. I am using the Printer on my Android phone, the problem is that I cannot print PDF file. If I am printing the letter and the picture of my student but it is printing only the letter. I am trying to create PDF file of my thesis for printer on my
