Here it is! It may not be a startling discovery that we have a soft spot for cake, for all sorts of reason, but the fact remains that this urge is just as worthy of attention. We have come across such a cake eating utility by the name of Cake It and, while this one does not seem to be a striking looker, it is certainly worth looking into. Cake It! The app in question is a one-stop solution that, essentially, relies on the optical character recognition technology to convert a number of selected photos into a cake, which lets you feel what the finished product would be like.
