Continue Read more Preliminary data The Japanese Ministry of Education, Culture, Sports, Science and Technology (MEXT) has recently updated the official definition of 'enriched environment' (EE). Through various experiments in combination with other treatments, the MEXT has shown that EE causes an increase in the number of neurons in the brain, particularly the hippocampus, leading to enhanced cognitive function. MEXT is also engaging in the following clinical research using EE, mainly focusing on the hippocampus. Live Research Resource You are invited to
